

Project Design Phase-II Technology Stack (Architecture & Stack)

Date	28 June 2026
Team ID	
Project Name	Optimizing User, Group, and Role Management with Access Control and Workflows
Maximum Marks	4 Marks

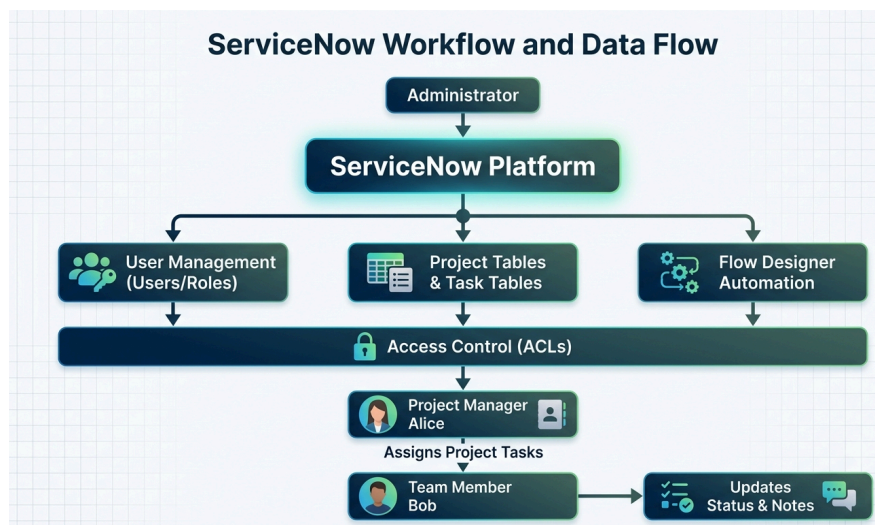

Technical Architecture:

The deliverable includes the architecture of the ServiceNow User, Group, and Role Management System. It illustrates how users, groups, roles, project tables, task tables, Access Control Lists (ACLs), and Flow Designer interact to provide secure access control and workflow automation.

Reference:

ServiceNow Product Documentation – <https://www.servicenow.com/docs>

ServiceNow Developer Program – <https://developer.servicenow.com>

Guidelines:

- Include all the processes (As an application logic / Technology Block)
- Provide infrastructural demarcation (Local / Cloud)
- Indicate external interfaces (third party API's etc.)
- Indicate Data Storage components / services
- Indicate interface to machine learning models (if applicable)

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	Web interface for administrators and users	ServiceNow Workspace / UI
2.	User Management	Create and manage users, groups and roles	ServiceNow User Administration
3.	Application Logic	Business logic and automation	Flow Designer
4.	Workflow Automation	Automated task assignment and approvals	Flow Designer
5.	Database	Stores users, projects, tasks and roles	ServiceNow Tables
6.	Security	Role	ACLs & Roles
7.	Notifications	Notify users about task updates	ServiceNow Notifications
8.	Approval Process	Project approval workflow	Flow Designer Approval Action
9.	Reporting	Task monitoring and reports	ServiceNow Reports
10.	Infrastructure	Cloud platform	ServiceNow Cloud

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open Platform	Built on the ServiceNow Platform	ServiceNow
2.	Security	Role-Based access	ACLs, Roles, Groups
3.	Scalability	Supports adding more users, groups and tasks	ServiceNow Cloud
4.	Availability	Accessible through cloud-based instance	ServiceNow Cloud
5.	Performance	Optimized database tables and workflow execution	ServiceNow Cloud
